S&M HUB · ACCESS GUIDE

BEFORTH

PREPARED FOR AUREOLE — SALES & MARKETING

WHO SEES WHAT
ROLE SCOPING EXPLAINED

A short, plain-language guide to how S&M Hub decides which records and dashboard numbers each person can see, and why. No technical knowledge needed.

PREPARED BY	PREPARED FOR	DATE	APPLIES TO
BeForth	Aureole — Sales & Marketing	October 2026	S&M Hub v1.4.9

THE IDEA IN ONE MINUTE

Everyone in S&M Hub signs in with their company ID. The system then answers two **separate** questions about every person:

1. WHAT CAN I DO?

Create, edit or delete a lead, order or event. This is decided by your **permissions**, set in HRMS by your administrator. If you lack one, the button simply isn't there.

2. WHAT CAN I SEE?

Which leads, orders, contacts and dashboard numbers appear in your lists. This is decided by your **role and your place in the reporting line**. This guide is about this question.

THE ONE RULE TO REMEMBER

A record belongs to the person who **created** it, and it is visible **upward** to everyone above them in the reporting line. It is never visible sideways to colleagues at the same level, and never downward.

THE ROLES, IN SIMPLE TERMS

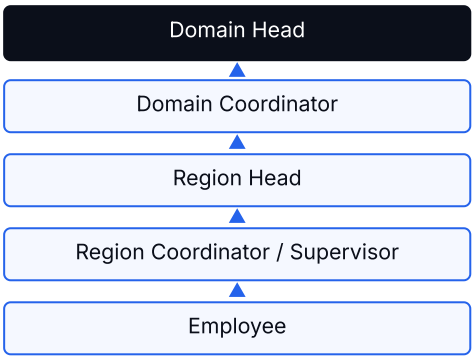

ROLE	IN SIMPLE TERMS
Super Admin	Sees everything across the company. Sets up domains, regions and targets.
Domain Head	Responsible for a whole market (for example Domestic or Export) and sees all of it.
Domain Coordinator	Supports a Domain Head. Sees the whole domain, but cannot change its structure.
Region Head	Responsible for one or more regions and the team working in them.
Region Coordinator / Supervisor	Mid-level. Sees their own work and their employees' work, with limited actions.
Employee	A salesperson. Works on their own records.

GOOD TO KNOW

Someone who holds the **marketing.admin** permission (a CEO, for example) can **see** everything like a Super Admin. That is visibility only. They still need the matching permission for each action, such as deleting a lead.

THE REPORTING LINE

Leads, Orders, Contacts and Customers all follow the same reporting line. Each person sees what they created, plus what everyone **below** them created.

Records travel up this line from whoever created them

IF THE RECORD WAS CREATED BY...	...THESE PEOPLE CAN SEE IT
Domain Head	Themselves
Domain Coordinator	Themselves, Domain Head
Region Head	Themselves, Domain Coordinator, Domain Head
Region Coordinator / Supervisor	Themselves, Region Head, Domain Coordinator, Domain Head
Employee	Themselves, Region Coordinator / Supervisor, Region Head, Domain Coordinator, Domain Head

Super Admin always sees everything.

> **EXAMPLE**
> Asha (an Employee) creates a lead. Her Region Head and Domain Head can see it. Her colleague Ravi, also an Employee, cannot, even if they work in the same region.

THREE THINGS THAT ADJUST THE RULE

SITUATION	WHAT HAPPENS
The lead is assigned to you	You can always see it, whoever created it.
A coordinator files a lead on someone's behalf	That lead is not shared up the normal line. Only the coordinator who filed it, the person it was filed for, the Head of that domain and (if different) the assignee can see it. Super Admin also sees it.
An order is created	The "creator" is whoever turned the lead into an order. The person who owns the lead keeps sight of the order as the assignee.

Who can choose "Assigned to": Super Admin (anyone), Domain Head and Coordinator (people in their domain), Region Head (people in their region). Region Coordinators, Supervisors and Employees do not get this field.

WHAT EACH AREA FOLLOWS

AREA	HOW VISIBILITY WORKS
Leads and Orders	The reporting line (previous page).
Contacts and Customers	The reporting line. For a Customer, the Account Manager can always see it, like an assignee.
Organizations and Plants	By territory: you see an organization when it is linked to a contact or customer in your domain or region.
Events and exhibitions	See the table below.
Service (contracts, visits, work orders, store, complaints)	Controlled by **permissions only**, not by who created a record. It is a shared area, so view access is broad and actions depend on permission.

EVENTS AND EXHIBITIONS

ROLE	EVENTS THEY SEE
Super Admin	All events
Domain Head / Coordinator	Events in their domain(s)
Region Head / Coordinator / Supervisor	Events in the domain(s) their regions belong to
Employee	Only events they are on (selected, travel or hotel list) or created

DOMAINS AND TARGETS PAGE

ROLE	OWN AREA	OTHER DOMAINS / REGIONS	CHANGE STRUCTURE
Super Admin	**Yes**	**Yes**	**Yes**
Domain Head	**Yes**	**Admin can allow**	View only
Region Head	**Yes**	**Admin can allow**	View only
Employee	**Own region and target**	No	View only

An administrator can widen or narrow some of these views with the Visibility settings, for example to let team members see each other's targets.

> **WHO CAN CHANGE THESE RULES?**
> Permissions and roles are managed by your administrator in HRMS. The reporting-line rules themselves are built into the system, so changing them is a development change, not a switch an administrator can flip.

THE DASHBOARD

Every number on a dashboard is filtered to **your own scope** by the server before it reaches your screen. The same rule applies: you only ever see figures built from records you are allowed to see.

DASHBOARD ITEM	WHOSE NUMBERS IT SHOWS
Monthly Target and the monthly trend	Employee: your own target. Region Head: your team. Domain Head: your domain. Super Admin: the whole company. The card says which one ("My", "Region", "Domain", "All").
Follow-ups Needed	The same scope as above. It lists leads that are overdue, due today or due in the next 7 days, from dates people set on a lead and from the automatic "follow up every N days" rule of the lead's stage.
Leads by Region, Lead Breakdown and lead lists	Only leads inside your scope.
Star Performer of the Month	The same for everyone: one company-wide winner by value won this month. Domain Heads are not eligible, and the amount is never shown. A lead filed on someone's behalf counts for the person it was filed for.
Leads around the world (map)	Domain Heads and Super Admins only.
Audit logs	Administrators only.

> **WHY ONE WINNER FOR EVERYONE?**
> Star Performer is a recognition card, not a ranking table. Showing only one name, with no amounts, celebrates good work without exposing anyone's individual figures.

"WHY CAN'T I SEE THIS?"

1. **Who created it?** If a colleague at your level or below created it, you can't see it unless you are above them in the line or it is assigned to you.
2. **Is it Won or Lost?** Turn on the Won & Lost toggle on the Leads board.
3. **Is a filter on?** Check "Only mine", the date range and the search box.
4. **Is a stage column hidden?** "Hide Empty" hides stages with nothing in them.
5. **Missing a button, not a record?** That is a permission. Ask your administrator to check your HRMS role.
6. **Past-quarter numbers missing on Domains?** That is a Visibility setting. Ask an administrator.
